

Volunteers Wanted!

Tuesday 1st June – Saturday 5th June 2021

Come and help build the rain garden at Shalbourne CE Primary School

Rain Gardens are uniquely designed gardens that reduce and slow down the flow of storm water into the sewer system.

This helps to prevent untreated waste overflowing into our rivers.

Our garden will create space for wildlife and children's play too.

Activities include:

- creating a rain garden and rain planters.
- Planting, pruning, willow den weaving, creating a dead hedge (great for wildlife), wildflower seeding, drilling bee posts and forming a natural play area using sarsen stones, balance logs and stepping logs.

Full instructions and tools provided.

10am – 3pm - volunteer for the morning, afternoon or both!

Child friendly activities and child care available at school. Tea and cake provided.

For more information or to book your place please contact
